- ✓ Mobile app to monitor multiple properties while home or away
- ✓ Alerts and automatic water shutoff to protect your home and valuables
- ✓ Easily ties into home security systems

What is...

7X more likely than
fire

?

6X more likely than
burglary

It's WATER DAMAGE!

The Leak Defense System continuously monitors your home for hidden leaks and automatically shuts off the water and alerts you if one is detected. Easily control the water flow to your home using the onsite control panel or access it on the go with the mobile app. With multiple ways to monitor your home, you'll always feel protected. Our full line of accessories allows Leak Defense to work with any type of home plumbing system.

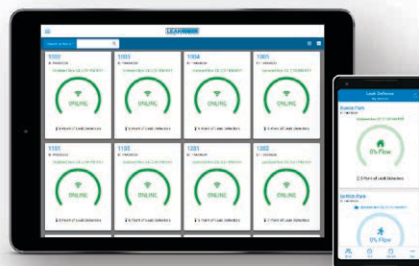

Leak Defense Valve

Constantly monitors and automatically shuts off water if leak is detected

On-Site Control Panel

Allows you or others to control the system on-site and get alerts when there's an issue. No WiFi required!

Mobile App

Allows you to remotely monitor & control water for one or multiple systems
