

Detect Leaks at the Source

with Point of Leak Detectors

30% of home insurance claims are due to **water damage.**

Customize Your Protection

- POLD and Water Sensor Rope function together as a standalone unit. They can also be seamlessly integrated with your automatic water shutoff Leak Defense System, giving you the highest level of protection.
- When a leak is detected, the POLD unit sounds an alarm. With optional API unit, it sends an alert to the onsite control panel as well as the Mobile App. With a full Leak Defense system, you're able to shut your water off, no matter where you are, stopping flood damage in its tracks.
- Water Sensor Rope comes in several lengths and goes places other sensors can't, allowing you to extend and customize your coverage.

Simple, Effective, and Reliable

- ✓ **No plumbing required.** Wireless and battery powered for easy and versatile placement
- ✓ **Silent operation.** Place the POLD anywhere you want protection from water damage.
- ✓ **Enjoy the peace of mind that comes with total home and business protection.**

Premier Insurers Agree; **POLD with Water Rope Sensor** offers the Best Protection Available for your home or business. Many residential and commercial policies offer incentives for Leak Defense product installations. Discuss installing POLDs and Leak Defense Systems with your insurance agent.
